THERMOHYGROGRAPH

DESCRIPTION

The thermohygrograph is portable drum temperature and humidity recorder. Recording is done by means of nibs, on graph paper wound around the rotating drum. Recording and drum rotation can be mechanical or with battery, daily and weekly type. For a perfect recording ensure that there is not exposed to a direct sunlight or to sources of radiant heat.

TECHNICAL SPECIFICATIONS

- Accuracy $\pm 1.6\%$
- Humidity measuring unit: Little hair grid
- Accuracy: 10–40% H. $\pm 5\%$
40–100% H. $\pm 3\%$
- Case: AISI 304 steel stand and cover (stove enamelling at 160°C available on request)
- Writing: Synthetic fiber nib with non rechargeable cartridge with a writing range of approximately 400 meters
- Battery: 1.5 V AA – LR6 Alkaline
