ABRASIMETER SCRATCH TEST TABLEWARE

DESCRIPTION

Laboratory instrument designed to create a repeatable process for testing the surface of a sample against scratches, suitable for measuring the strength of colors / metals applied to a surface. The instrument is equipped with a digital counter, and is complete with a set of accessory weights for adjusting the scratching force and a knife holder adapter.

TECHNICAL SPECIFICATIONS

- Constant speed motor
- Number of shots recorded on the digital countdown
- Standard cycle settable in the programmer
- Automatic stop once the required strokes have been performed
- Arm stroke length adjustable between 10mm and 130mm
- Manual selection of the weight of the arm

EQUIPMENT

- 6 heads
- Knife adapter (to reproduce abrasion of a normal table knife)
- Accessory clamp to perform abrasion tests on cups or similar shapes (to be ordered separately)

ACCESSORIES AND SPARE PARTS

GT2494	Cup test adapter for curved surface
